

APRIL 11, 2014  
ADDENDUM #2  
STORM WATER RETENTION BASIN AND STORM WATER OUTFALL MONITORING  
PROGRAM

The City of Portage has received several questions regarding chemical analysis. The following is offered as a clarification to the request for proposals:

*Chemical analysis is only required for the five (5) NPDES outfall locations. Inspection of the 120 IDEP locations will be used as a screening process to gauge the necessity of future chemical testing at those sites. Any additional testing at the IDEP sites would be considered outside the requirements of this contract, and would be at a cost borne by the City.*

All remaining specifications are unchanged. Proposals remain due by 3:00 p.m., April 16, 2014.

If you have any questions regarding purchasing procedures, please phone Judy Johnson, Purchasing Manager at (269) 329-4534. If you have any questions regarding the specifications, please contact W. Christopher Barnes, Director of Transportation & Utilities at (269) 324-9284.
