## EXECUTIVE SUMMARY

Tracy Cross & Associates, Inc. is pleased to submit our Strategic Market Analysis addressing residential development opportunities throughout the city of Portage, Michigan. Our objective is to provide the City of Portage and associated stakeholders with a full understanding of relevant regional economic and residential market trends as they may impact upon future residential and/or mixed-use development initiatives throughout the city. Our report is intended to serve as the basis for attracting and retaining high quality investment in Portage and as a guideline for policy decisions and implementation strategies. This Addendum Summary focuses specifically upon the defined Lake Center District which may represent a principal area of initial opportunity.

### A FRAMEWORK FOR PLANNING

The City of Portage and its stakeholder partners recognize the necessity to ensure a full continuum of quality housing alternatives to meet the needs of a diverse base of today's – and tomorrow's – constituents and ensure that Portage remains positioned to attract and retain future workforce generations by enhancing quality of life components and "Main Street" investment in support of local businesses, the arts, dining, and civic amenities which are all within a reasonable distance of one's home. As detailed in our full analysis, residential opportunities in Portage span market rate/workforce moderate-density apartment as well as low-density rental idioms, along with continued phased introduction of attached and detached for sale housing forms.

Serving to instill momentum, and within the context of the city's Draft 2024 Master Plan, our report forwards recommendations for introduction of a variety of housing products which can achieve reasonable absorption levels at market-consistent rents and/or sales prices. It is noted that these benchmark guidelines are presented in 2023 dollars, are forwarded for purposes of financial modeling, and are intended to assist public officials in planning strategies, builder participant selection, and implementation efforts long term. Across most product types, it is expected that *up to three (3)* developments could be concurrently marketing at any given time *assuming that product offerings provide a continuum of plan types and rent/price points*, continuous construction and delivery schedules are maintained for all phases and/or individual projects, and development adheres to the following criteria:

- First and foremost, builder participants must maintain a disciplined approach to residential product offerings which follow a logical hierarchy in terms of product form, unit sizes and rents/sales prices which can be easily understood by the consumer and, at the same time, maximize efficiencies and overall profitability.
- Housing product must remain within the affordability limits of the market to ensure that development(s) are equally attractive to young professionals in the early stages of their career, middle income/entry-level homebuyers, localized move-up purchasers, transferees, and downsizing empty-nesters, as well as those younger and/or mature cohorts desirous of a low-maintenance lifestyle.
- Most importantly, as it is likely that builder partners attracted to development opportunities in Portage will largely represent the region's group of established, privately-held homebuilding companies, it is *imperative* that city planners work with developer partners to establish strict development covenants for all future projects which ensure that respective developments maintain consistent architectural elevations, color palettes, as well as aesthetic treatments including streetscape, lighting, signage, landscape, placement of pocket parks, walking trails and other greenspace for active and passive recreation/reflection that meet the expectations of existing and

**Addendum Planning Analysis  
City of Portage – Lake Center District  
Economic and Residential Outlook  
Portage, Michigan**

---

future/transferee households. Adherence to development covenants is paramount to the integrity of future residential developments in order to sustain momentum and (again) maximize consumer appeal and overall profitability. At the same time, public officials must be prepared to *partner with homebuilders regarding infrastructure and other public improvements and/or regulatory requirements* in order to achieve the shared goal of ensuring the availability of quality housing options which span a full continuum of consumer segments and affordability levels.

## **RESIDENTIAL OUTLOOK**

As fully detailed in Section 2 of this report, market fundamentals which have guided the region's economy over the last decade remain intact and support future residential housing initiatives throughout the city of Portage. Based upon a synthesis of economic factors and empirical residential trends, over the 2023-2028 forecast period (and for planning purposes extended through 2033), the defined Kalamazoo County Market Area could support construction of up to 920 new housing units yearly, distributed between 485 units in ownership sectors and 435 market rate rental forms.

**ANNUAL RESIDENTIAL CONSTRUCTION POTENTIALS BY PRODUCT TYPE  
-- KALAMAZOO COUNTY MARKET AREA --  
2023 - 2033**

Product Type	Average Annual Absorption (In Units)		
	Kalamazoo County Market Area	City of Portage	
		Total Units	Percent of Market Area
<b>Total</b>	<b>920</b>	<b>465</b>	<b>50.5</b>
<b>For Sale</b>	<b>485</b>	<b>245</b>	<b>50.5</b>
Single Family Detached	335	160	47.8
Townhome/Condominium	150	85	56.7
<b>For Rent</b>	<b>435</b>	<b>220</b>	<b>50.6</b>

(1) Estimates are subject to zoning constraints which could pose limitations on project densities, product form, development timeline, etc. These estimates assume that sufficient development parcels are available and, most importantly, that future for sale and rental apartment developments maintain competitive sales prices/rents.

Source: Tracy Cross & Associates, Inc.

In for sale categories, single family detached forms (*including site condominiums*) will account for some 69.0 percent of all new ownership construction or 335 units yearly, with attached ownership forms representing the remaining 150 units yearly (on average). It is expected that the majority of new detached for sale construction will occur in suburban areas of Kalamazoo County as the generally built-out nature of the urban core will effectively limit for sale development to smaller infill locations and/or redevelopment sites. Conversely, *non-student* rental housing construction requirements through forecast timeframe, cast at 435 units yearly, will remain concentrated in the cities of Kalamazoo and Portage.

This construction forecast reconciles regional household growth projections, anticipated strained for sale inventory levels over the near term, a measure of replacement demand, and vacancy allowances to permit adequate market filtering. The 485-unit annual ownership forecast is modestly higher than the 400-unit average noted during the 2017-2022 timeframe and considers the expectation of measured post-pandemic economic growth through the forecast period and beyond. Similarly, the 435-unit annual rental construction projection also considers shifts in housing trends in recent years, and reflects the potential introduction of

**Addendum Planning Analysis  
City of Portage – Lake Center District  
Economic and Residential Outlook  
Portage, Michigan**

---

lifestyle, low-density attached townhome/duplex and single family detached rentals over the forecast period. It is also noted that new residential construction requirements *could potentially double during any given year* if supply were made available and *competitive sales prices and rents are maintained*. Derived residential construction requirements represent more than adequate support for future residential development initiatives throughout the city of Portage.

Further disaggregating potential ownership construction requirements based upon the distribution of household incomes throughout Kalamazoo County, together with an examination of existing and new construction single family and attached closings over the last 44 months (2020-August 2023), new construction for sale potentials will carry an average closing price of \$395,653 ***in 2023 dollars***. As delineated in the following text table, over the forecast period, it is expected that just over one-half of new production/semi-custom closings (52.5 percent or +/-255 units yearly) will be concentrated at *current 2023 dollar* price points below \$399,000, with another 33.3 percent or an estimated 160 closings yearly aligning pricing categories of \$400,000 to \$549,999. By housing type, new single family closings are expected to carry an average current dollar closing price of \$385,900 with a modest 19.4 percent expected to carry closing prices of \$550,000 or more. Attached for sale alternatives, in turn, are expected to carry an average current dollar closing price of \$408,500, reflecting the preponderance of lifestyle site condominiums and duplex offerings concentrated in the more urban areas of the county (refer to Appendices A2.6 and A2.7).

**ANNUAL NEW CONSTRUCTION POTENTIALS BY PRICE RANGE AND PRODUCT TYPE**  
-- KALAMAZOO COUNTY MARKET AREA --  
2023 - 2028

Closing Price Range (In 2023 Dollars)	Total		Single Family Detached		Townhome/Condominium	
	Annual Closings	Percent	Number of Sales	Percent	Number of Sales	Percent
\$250,000 - 299,999	40	8.2	30	9.0	10	6.7
300,000 - 349,999	100	20.6	70	20.9	30	20.0
350,000 - 399,999	115	23.7	85	25.4	30	20.0
400,000 - 449,999	75	15.5	50	14.9	25	16.7
450,000 - 499,999	55	11.3	35	10.4	20	13.3

<b>Total</b>	<b>485</b>	<b>100.0</b>	<b>335</b>	<b>100.0</b>	<b>150</b>	<b>100.0</b>
<b>Average</b>		<b>\$395,653</b>		<b>\$389,900</b>		<b>\$408,500</b>

Source: Tracy Cross & Associates, Inc.

It is unlikely, however, that *ownership* demand potential will be met given the region's established pattern of *phased* development over an extended period of time. For example, as detailed in Appendix A2.8, while at present there are some 19 separate single family and townhome/duplex ownership developments and a collective 767 potential new units in some stage of the Kalamazoo County planning pipeline, virtually all reflect additional phases of existing subdivisions with the average future phase reflecting a modest 40 units in size. Similarly, there are an additional 17 rental projects and some 2,196 potential new units in planning. In this sector, as well, most developments are of moderate scale averaging 129 units in size. Notably, in Portage itself, only 183 ownership units and 180 rental units are currently under construction and expected to begin marketing over the coming 12- to 18 months. These include (among others) *Willow Crossings*, a 23-unit townhome development; 150 single family units representing additional phases of *The Oaks* and *Streamsong Condominiums*, along with the 180-unit *Tall Timbers* midrise apartments. Hence, development of rental and ownership housing forms in the city of Portage (and, for that matter, throughout Kalamazoo

**Addendum Planning Analysis  
City of Portage – Lake Center District  
Economic and Residential Outlook  
Portage, Michigan**

---

County) will serve to alleviate some measure of pent-up demand for quality housing alternatives which meet the needs of today's – and tomorrow's consumers.

## BENCHMARK DEVELOPMENT STRATEGIES

Consistent with the vision outlined in the city's Draft 2024 Master Plan, Section 1 of the full analysis provides product development guidelines for a range of rental and for sale housing alternatives as well as general geographic positioning recommendations for consideration. To summarize, the benchmark strategies are consistent with the newest rental and for sale housing products available throughout the Kalamazoo-Portage region and elsewhere in the Midwest, primarily representing product lines marketed by regional homebuilders today. These guidelines provide a logical continuum of plan types, unit sizes and rent/price points which place the respective absorption forecasts in perspective and span a broad range of affordability levels. Benchmark strategies for all for sale idioms also appropriately position each suggested product type in line with new and existing attached and detached home prices in the region, with forecasted sales volumes established to achieve reasonable annual sales cast against new construction demand at price points between \$300,000 and \$700,000 over the near term 2023-2028 forecast period. Projected leasing periods assume extensive marketing commences with site improvements and three- to six months of lease reservations prior to initial deliveries. While market conditions are expected to remain tight through the forecast period, over the course of lease-up, it may be necessary to offer a discount or lease incentive on *select units* as market conditions dictate. Also, while it is understood that unit counts may vary with final design and approvals, it is strongly suggested that a *proportionate ratio of unit types and plan sizes be maintained* in order to achieve the projected rates of absorption.

Utilizing energy-efficient construction technologies, design aesthetics should complement the respective environs of each project while providing quality rental and for sale housing options which meet the needs of today's workforce and/or lifestyle renters/homeowners. In the rental sector, amenities for larger-scale projects of at least 150 units are also expected to include an outdoor pool/water feature and/or sports courts. Across all rental housing forms, acreage should be reserved for a dedicated pet area/park, greenbelt detention areas, as well as walking trails which link development phases (as appropriate).

Source: Tracy Cross & Associates, Inc.

While opportunities exist throughout the city for a variety of new residential development, the following paragraphs isolate upon the defined Lake Center District and those housing products which are viewed to represent the strongest *initial* residential redevelopment opportunities within this key area. Appendix LCD-A1 summarizes pertinent demographic and socio-economic characteristics of the Lake Center planning district for perspective.

## **LAKE CENTER DISTRICT**

The Lake Center District straddles Portage Road extending south from Centre Avenue to Osterhout Avenue. This defined gateway area is characterized by established commercial venues co-mingled with office buildings, banking facilities, medical offices, and a variety of fast/fast casual eateries, automotive services and marine-service businesses. The District is also within walking distance of West Lake and Austin Lake, the Portage Soccer practice facility, together with the regional Ramona Park which features multiple ballparks, sports courts, and parklands as well as a small public beach of the adjoining Long Lake. Most importantly, manufacturing facilities of Pfizer and Stryker Medical equipment, two of the region's largest employers, along with the recently opened FedEx Portage Road facility are also within one mile east and south (respectively) of the defined planning district. Residentially, the general area includes established neighborhoods of post-WWII bungalows co-mingled with vintage lakefront cottages and newer single family homes which presently support values extending from the high \$500,000s to more than \$1.1 million. Within this defined district, **Exhibit LCD.1** summarizes benchmark recommendations for a variety of contemporary moderate-density rental idioms as well as for sale alternatives which could be introduced within infill and/or redevelopment parcels throughout the defined District consistent with the vision outlined in the city's Draft 2024 Master Plan. While this exhibit isolates upon those housing products which hold the strongest potential near term, it must be noted that over time *most (if not all)* rental apartment and (particularly) for sale housing idioms could be introduced within this very lifestyle-oriented area.

Lake Center District

## **CLOSING REMARKS**

As noted, that the distribution of future housing demand has been presented in 2023 dollars. It must also be noted that recent sharp rates of growth in both home prices and rents *are not sustainable*, especially considering the impact of persistently high rates of inflation and related economic uncertainties now evident which could serve as a barrier to residential development initiatives for at least the near term. Therefore, in evaluating proposals which may come before the city, it is reiterated that in order to sustain pro-active regional economic development initiatives to attract and retain workforce talent, the city should be prepared to provide and/or partner with regional stakeholders to promote employment opportunities; initiate workforce training and continuing education programs; and (importantly) partner with regional homebuilders to ensure the continued availability of a quality housing options over the long term.

These initiatives must include infrastructure improvements necessary to enable not only economic expansion, but also a broad range of housing options and levels of affordability. As such, in addition to utilization of established Opportunity Zone designations, the city should strongly consider the creation of Neighborhood Enterprise Zones and application of other tax incentive vehicles such as the recently approved State of Michigan SB129 which could serve to initiate redevelopment opportunities throughout Portage and (particularly) in its core *Lake Center* planning districts as envisioned in the Draft 2024 Master.

Product Line Summary		
Moderate-Density Mixed-Use (Residential Above Commercial) and/or Residential w/Structured Parking		
 	<b>Total Units:</b> 100 - 200 <b>Density in Units Per Acre:</b> 28.0 to 40.0 <b>Plan Types (Bedrooms):</b> 0, Jr-1, 1, 2, 3 <b>Plan Size</b> <b>Range:</b> 475 - 1,250 <b>Average:</b> 875 <b>Benchmark Posted Rents</b> <b>Range:</b> \$1,275 - \$2,145 <b>Average:</b> \$1,725 <b>\$/Sq. Duplex/Villa/Quadplex Rentals with Attached One- or Two-Car Garage		
	<b>Total Units(Per Phase/Project):</b> 24 - 48 <b>Density in Units Per Acre:</b> 5.5 to 8.0 <b>Plan Types (Bedrooms):</b> 1, 1+Flx, 2+Den, 3 <b>Plan Size</b> Range: 750 - 1,650 Average: 1,200 <b>Benchmark Posted Rents</b> Range: \$1,480 - \$2,490 Average: \$1,985 \$/Sq. Ft.: \$1.65 <b>Average Absorption (Units/Month) to 95% Stabilization</b> 3.5 to 5.0 <b>Parking Ratio:</b> 1.0 to 2.0 Per Unit <b>Garage (Attached):</b> Included	<ul style="list-style-type: none"> <li>This product line can be developed in duplex, triplex, and quad (four-plex) building types, and will appeal across multiple consumer segments including young families, contract workers and, importantly, mature singles and childless couples aged 55 and older. This product line may be suitable for introduction within planning areas of larger mixed-use developments, or as enclave communities in select locations of the city as appropriate.</li> <li>Commensurate with the scale of a given project, community amenities should include walking paths, a multi-use lawn court and gazebo area with grill stations suitable for social gatherings, a dedicated pet park and (possibly) a playground and/or community garden area.</li> </ul>
Single Family Detached Rentals (SFR) with Attached Two-Car Garage		
	<b>Total Units:</b> 40 to 60 <b>Density in Units Per Acre:</b> 5.0 (i.e., 45-50 x 100' lot) <b>Plan Types (Bedrooms):</b> 2, 3, 3+Loft, 4 <b>Plan Size</b> Range: 1,250 - 1,800 Average: 1,598 <b>Benchmark Posted Rents</b> Range: \$2,150 - \$2,750 Average: \$2,530 \$/Sq. Ft.: \$1.58 <b>Average Absorption (Units/Month) to 95% Stabilization</b> 2.0 to 3.0 <b>Parking Ratio:</b> 2.0 Per Unit Enclosed <b>Garage (Two-Car Attached):</b> Included	<ul style="list-style-type: none"> <li>This product line will appeal across multiple consumer segments including young families, transitioning families and multi-generational households, along with a component of mature singles and couples, including those who choose not to commit to or who may have been disenfranchised from homeownership. This housing alternative, <i>developed in slab-on-grade condition</i>, combines the benefits of a single family residence, including expanded indoor/outdoor entertainment areas, a direct-access garage, and increased storage opportunities with a maintenance-free living environment.</li> <li>Commensurate with the scale of a given project, community amenities should include walking paths, a multi-use lawn court and gazebo area with grill stations suitable for social gatherings, a dedicated pet park and (possibly) a playground and other passive amenities which link the planning area.</li> </ul>

<sup>(1)</sup> To be used for financial modeling; all images intended for illustrative purposes only. Benchmark prototype rents are presented in 2023 dollars. They do *not include* end-unit or site premiums, or other incremental revenues. Benchmark rents assume quality interior appointments and finishes, community amenities commensurate with the scale of a respective development, and on-site leasing and management. *It is assumed that a monthly fee will be assessed for common area lawn/landscape maintenance, and trash removal/recycling applied to Single Family Rentals only.*

<sup>(1)</sup> To be used for financial modeling; all images intended for illustrative purposes only. Benchmark closing prices are presented in 2023 dollars. They *include* a 4.0 percent *estimate over base* for options/upgrades and site premiums. They assume *slab-on-grade* construction and quality interior appointments and finishes commensurate with new construction alternatives in the marketplace as defined. It is assumed that an association fee will be required for lawn/landscape maintenance, snow removal, trash removal/recycling, insurance and reserves. Exterior home maintenance will be the responsibility of the homeowner as defined by covenants. Estimated closing prices also assume a dedicated marketing program, staffed on-site sales office/decorated model(s), and a *continuous construction and delivery schedule*.

Product Line Summary		
Single Family Detached Ranch Villa (Site Condominium / SFV Series)		
 	<p><b>Total Units (Per Phase/Project):</b> 30 - 40</p> <p><b>Minimum Lot Size (W' x D'):</b> 45' x 110'</p> <p><b>Density in Units Per Acre:</b> 5.0</p> <p><b>Basement Condition:</b> Slab-on-Grade</p> <p><b>Plan Types (Bedrooms):</b> 2, 2+Flex, 3, 3+Flex</p> <p><b>Plan Size</b>  <b>Range:</b> 1,450 - 1,800  <b>Average:</b> 1,625</p> <p><b>Benchmark Closing Prices</b>  <b>Range:</b> \$395,000 - \$440,000  <b>Average:</b> \$415,000  <b>\$/Sq. Ft.:</b> \$255.38</p> <p><b>Sales Forecast (Units/Year)</b> 24.0</p> <p><b>Parking:</b> Attached Two-Car</p>	<ul style="list-style-type: none"> <li>Envisioned as an age-targeted but not restricted lifestyle alternative, this product line facilitates single level living <b>within a low-maintenance community</b>. Reflecting slab-on-grade construction, this product line may be developed in front- or rear-load garage condition. Four ranch-style plans are recommended, with the largest plan representing a master-on-main design with loft/bonus space. This product line is appropriate for infill residential areas as well as a component of larger, planned developments incorporating a variety of housing alternatives.</li> <li>All homes should include a two-car garage and a 10 ft. x 10 ft. patio, front and rear exterior lighting and faucets, asphalt driveway and concrete walkway.</li> <li>It is assumed that an association fee will be required for lawn/landscape maintenance and snow removal for all homesites and common areas, maintenance of common area lighting, insurance and reserves. Exterior home maintenance is the responsibility of the homeowner.</li> <li>Based upon development size, community-based amenities should include (at minimum) parks/ greenbelt, walking paths with gazebo seating, and a dedicated pet area. For developments of 100 units or more, a clubhouse with indoor/outdoor social areas should be considered.</li> </ul>
Single Family Detached (SF55 Series)		
 	<p><b>Total Units (Per Phase/Project):</b> 30 - 40</p> <p><b>Minimum Lot Size (W' x D'):</b> 55' x 120'</p> <p><b>Density in Units Per Acre:</b> 3.5</p> <p><b>Basement Condition:</b> Full Unfinished</p> <p><b>Plan Types (Bedrooms):</b> 3, 3+Loft/Flex, 4</p> <p><b>Plan Size</b>  <b>Range:</b> 1,650 - 2,400  <b>Average:</b> 2,100</p> <p><b>Benchmark Closing Prices</b>  <b>Range:</b> \$330,000 - \$395,000  <b>Average:</b> \$360,000  <b>\$/Sq. Ft.:</b> \$171.43</p> <p><b>Sales Forecast (Units/Year)</b> 18.0</p> <p><b>Parking:</b> Attached Two-Car</p>	<ul style="list-style-type: none"> <li>This product line adapts better-selling ranch and two-story designs from national production-oriented homebuilders intended to appeal to entry-level and mainstream family segments. All homes should provide at least three bedrooms, with most homes also featuring additional bonus/flex areas, an <i>unfinished</i> basement, and a two-car garage as standard. As site conditions warrant, walk-out basements and/or a 3-car garage optional. Walk-out basement and 3-car garage <i>not included</i> in estimated benchmark closing prices.</li> <li>All homes should include a 10 ft. x 10 ft. patio, front- and rear exterior lighting and faucets, asphalt driveway and concrete entrance walkway.</li> <li>Assuming planned developments of 100+ units, (at minimum) community-based amenities should include parks, walking trails with gazebo seating, a playground, sports fields, and a dedicated pet park.</li> </ul>

<sup>(1)</sup> To be used for financial modeling; all images intended for illustrative purposes only. Benchmark closing prices are presented in 2023 dollars. They *include* a 5.0 percent *estimate* over base for options/upgrades and site premiums. It is acknowledged that an *additional* 4.0- to 8.0 percent in upgrades/customization may be generated based on individual consumer preferences. Benchmark closing prices assume *slab-on-grade* construction for SFV Series; and a full, *unfinished* basement for SF55 Series homes, along with quality interior appointments and finishes commensurate with new construction alternatives as defined. Estimated closing prices also assume a dedicated marketing program, staffed on-site sales office/decorated model(s), and a *continuous construction and delivery schedule*.

Product Line Summary		
Single Family Detached (SF70 Series)		
	<p><b>Total Units (Per Phase/Project):</b> 30 - 40</p> <p><b>Minimum Lot Size (W' x D'):</b> 70' x 125'</p> <p><b>Density in Units Per Acre:</b> 2.5</p> <p><b>Basement Condition:</b> Full Unfinished</p> <p><b>Plan Types (Bedrooms):</b> 3, 3+Flex, 4, 4+Family</p> <p><b>Plan Size</b></p> <p><b>Range:</b> 1,750 - 2,500</p> <p><b>Average:</b> 2,250</p> <p><b>Benchmark Closing Prices</b></p> <p><b>Range:</b> \$395,000 - \$475,000</p> <p><b>Average:</b> \$450,000</p> <p><b>\$/Sq. Ft.:</b> \$200.00</p> <p><b>Sales Forecast (Units/Year)</b> 20.0</p> <p><b>Parking:</b> Attached Two-Car</p>	<ul style="list-style-type: none"> <li>This product line also adapts better-selling ranch and two-story designs of regional and national homebuilders, expanding living area to +/-2,500 square feet. All homes should provide at least three bedrooms, and two and one-half baths, with most homes also featuring additional bonus/flex area, a family room, <i>unfinished</i> basement, and a standard two-car garage. The largest suggested plan should represent a master-on-main design with three and one-half baths. As site conditions warrant, walk-out basements and/or a 3-car garage are optional. Premiums for walk-out basements and 3-car garage are <i>not included</i> in estimated closing prices.</li> <li>All homes should include a 10 ft. x 10 ft. patio, front- and rear exterior lighting and faucets, asphalt driveway and concrete entrance walkway. Interior appointments/finishes should include upgraded appliance packages, upgraded cabinetry and flooring throughout, master baths with separate tub and shower.</li> <li>Assuming planned developments of 100+ units (at minimum) community-based amenities should include parks, walking trails with gazebo seating, a playground, sports fields, and a dedicated pet park.</li> </ul>
		
Single Family Detached (SF85 Series)		
	<p><b>Total Units (Per Phase/Project):</b> 30 - 40</p> <p><b>Minimum Lot Size (W' x D'):</b> 85' x 130'</p> <p><b>Density in Units Per Acre:</b> 2.0</p> <p><b>Basement Condition:</b> Full Unfinished</p> <p><b>Plan Types (Bedrooms):</b> 3+Den, 4+Family, 5</p> <p><b>Plan Size</b></p> <p><b>Range:</b> 1,950 - 3,200</p> <p><b>Average:</b> 2,550</p> <p><b>Benchmark Closing Prices</b></p> <p><b>Range:</b> \$495,000 - \$600,000</p> <p><b>Average:</b> \$585,000</p> <p><b>\$/Sq. Ft.:</b> \$229.41</p> <p><b>Sales Forecast (Units/Year)</b> 12.0</p> <p><b>Parking:</b> Attached Two- or Three Car</p>	<ul style="list-style-type: none"> <li>Representing established family alternatives, homes in this series should feature expansive entertainment areas, master suites with luxury appointments, a dedicated home office as well as a "pocket office" or home management space, and expanded closeting, pantry and laundry/drop-off areas at the owner's entrance. At least one (1) master-on-main design should be offered. Larger homes in this series should provide either a split- or side-entry 3-car garage as <i>standard</i>. As site conditions warrant, optional walk-out basements should be available. Estimated closing prices assume a component of 3-car garages but <i>do not include</i> walk-out basement condition.</li> <li>All homes should include a 10 ft. x 10 ft. patio, front- and rear exterior lighting and faucets, asphalt driveway and concrete entrance walkway. Interior appointments/finishes should include Café Series appliance packages, upgraded cabinetry and flooring throughout, master baths with separate tub and shower, with larger plans providing 3.5 baths.</li> <li>Assuming planned developments of 100+ units, (at minimum) community-based amenities should include parks, walking trails, a playground, sports fields, and a dedicated pet park.</li> </ul>
		

<sup>(1)</sup> To be used for financial modeling; all images intended for illustrative purposes only. Benchmark closing prices are presented in 2023 dollars. They *include* a 6.0 percent estimate over base for options/upgrades and site premiums. It is acknowledged that an *additional* 4.0- to 8.0 percent in upgrades/customization may be generated based on individual consumer preferences. Benchmark closing prices assume a full, *unfinished* basement, along with quality interior appointments and finishes commensurate with new construction alternatives as defined. Estimated closing prices also assume a dedicated marketing program, staffed on-site sales office/decorated model(s), and a *continuous construction and delivery schedule*.
